How To Get PAP Supplies Covered Before 2022 Ends

To order PAP supplies from AeroFlow Sleep, you need private insurance, Medicare, or Medicaid. We then look at your deductible; the amount you have to pay before your insurance plan will split the cost.

Luckily, it's the most wonderful time of the year! Patients who have met (or paid off) their deductible can get their PAP supplies covered through insurance!

See if you qualify at the link below or jump to Page 3 to find out what you can do if you haven't met your deductible.

QUALIFY

Orders must ship before December 30, 2022 for this offer to apply.

CURRENT PROJECTS: SYSTEM ONE REPLACEMENTS

On behalf of Philips Respironics, we're happy to share that patients with recalled System One, 60 Series CPAP and BiPAP machines can now:

- 1) Return the affected System One, 60 Series unit to Philips Respironics in exchange for \$50. Upon receiving your System One, 60 Series device, a check will be issued to you by Philips.
- 2) Continue to wait for Philips Respironics to supply you with a replacement device that is not a System One, 60 Series device. An up-to-date prescription is required.

To select either of the two options, please sign into Philips Respironics' Patient Portal, which can be accessed at www.philips.com/src-patient-information. There is no default option and no action can be taken without a selection.

HOW TO USE MY PAP SUPPLIES

Michelle Worley, RN and Director of Clinical Operations at AeroFlow Sleep has released several new educational videos, detailing how easy it is to set up your mask and machines.

From fitting to cleaning, these step-by-step tutorials are specific to your products; including top manufacturers like ResMed, Fisher & Paykel, Resvent, and Philips Respironics.

Additional resources are available within each YouTube description too. View the playlist [here](#)!

WHAT HAPPENS IF YOU HAVE NOT MET YOUR DEDUCTIBLE?

A high deductible can be very difficult to meet, so it's no surprise if you're not eligible for the front-page offer. That's why we're here to tell you about an alternative solution for patients who have an FSA or HSA account.

WHAT IS AN FSA?

A Flexible Spending Account (FSA) is a pre-tax account used to pay for medical expenses. Typically, patients with a high deductible have an FSA account to balance out expensive copays; however, like your deductible, unused payments do not roll over into the next year.

WHAT IS AN HSA?

A Health Savings Account (HSA) is similar in that it is a pre-tax account used to pay for medical expenses, but it is only available to patients who are self-employed. You can also withdraw from an HSA account at a 10% penalty while an FSA is more like a line of credit, from which withdrawals cannot be made.

PURCHASE PAP SUPPLIES WITH AN FSA OR HSA

Now that you have a better understanding of these accounts, how do they help get your PAP supplies covered through insurance? If you have not met your deductible, you can still purchase many products outright with the money in an FSA or HSA. Eligible supplies include masks, tubing, and water chambers.

USE IT OR LOSE IT

Remember, unused FSA payments do not roll over into 2023, so you either use it or lose it. This is your chance! See if you can get PAP supplies covered!
